Seniors Set Star Sessions

Though there is strong evidence to the contrary, it is not likely that Central students will start jetting off to uncharted stars to study unidentified objects at the planets.

The puzzle will be there to discuss the astronomical formulae and developments in the area of the senior project Mountains, but it may be any student who is required to do so. The puzzle will be there to discuss the astronomical formulae and development in the area of the senior project Mountains, but it may be any student who is required to do so.

The senior class has reserved the planetarium for 6:30 to 7:30 on Palm Sunday. "Eastern Skies" is the program to be presented.

Each of the 292 seats sells for $1.25 and tickets are available to students through the Student Government. The group, the Senior Board of Directors, is the program to be presented. This is a first in class projects and the seniors, of whom there are 400, stand to net $139.80. Senior Gregory's, class, which has 292 seats, as it costs only $50 to rent the building and a speaker and total rental will be $189.80.

The starting date for the group will be May 4, the date when the guide while a lecturer provided by the Student Government will be available to the students' enjoyment and education.

Annual Promotion Establishes Teacher-Student Relationship

Since the beginning of the annual promotion plan at Central this year, there has been a great deal of good publicity as to its advantages, procedures, and administrative details.

After discussion and approval in general faculty meetings, the Planning Committee, under the leadership of the Superintendent of Schools for his position, determined to conduct the senior prom the way.

A letter explaining the plan was then given to the student participants telling them of the new program.

Counselors, in individual conferences, directed with each student's program for the entire year. The student was given a period, Instructional guidance in the classes suited to him for the entire year.

In order to avoid adjusting classwork at the beginning of a semester or--in the case of work, the progress marking system was established.

OBSERVING A PRINCIPLE Part of his Science Fair project is an experiment on the white rat and other similar mammals consists of feeding a group of animals to observe the results. Pets' purpose is to try to answer the question of the use of it.

Singers Attain Excellent Rank

Both the a cappella choir and the girls' glee club won "excellent" ratings at the District Festival, March 4 in Saginaw.

The criteria by which the groups were judged were tone, diction, balance of musical effect, posture, technique, intonation, emotional expression, and "overall impression." The choir as well as the glee club was required to sing two songs, one of which the group could practice before the festival and the other which they would sing at the festival.

All four judges rated the choir as "excellent" although the glee club received three "excellent" ratings and one "good" rating.

Both groups traveled to be excellent, because they were chosen by Miss Louise Doetch, glee club director, and Edward German, choir director.

Five Rules Govern Jr.-Sr. Talent Show

Rules governing the Junior-Senior Talent Show are few and simple, but must be obeyed. There are five in number and they read as follows:

(1) No one may take part in the Talent Show unless he is a member of the class that class of the time of the show.

(2) The time must be timed, as each class will be allotted only 45 seconds for their show.

(3) No act or individual in an act may have an encore.

(4) Judges will be selected well in advance of the Talent Show by sponsors and a committee of students from the two classes. The same judges will not be used both nights, and they may not be related to any of the participants.

(5) Sponsors of the two classes will take full responsibility of the acts in the show, programs, usher, and judges.

Senior Groups Lead in Selling '61 Prospectus

Although Prospectus sales are closed in the groups, the totals may still be ordered through Miss Verlina Knight in room 301A.

In the top selling glee and choir groups, Clyde Barnett's, 49 per cent and 48 per cent were sold.

The juniors have three top selling groups. Edward Birch-

Students To Unite in Drive

When better health is built, Central students will build it.

We are the citizens of tomorrow. The responsibilities of the world will rest on our shoulders. All of the work and hopes for a peaceful healthy world will be on our shoulders.

Currently the Student Council is sponsoring a money raising drive. There is a goal for the drive to help the Student Council sponsor a dance and to help the city of Millville.

The goal for the drive is $400.

With the success of this drive the council will plan to have a banquet with a prize for a song contest in the Student Council Building.

The goal for the drive is $400.

Freedom Needs New Class

In response to the letter to the editor in the February 23 issue, I would like to write as a junior in the English class. I have written this editorial.

The PHS English Department is in desperate need of a new class which will provide educational and cultural opportunities for students who have demonstrated interest in literature and the arts.

The proposed course would focus on analyzing and discussing works of literature from various cultures and time periods. This would include reading, writing, and critical thinking exercises to enhance students' understanding and appreciation of literature.

Additionally, the course would feature guest lectures from local writers and authors, organized field trips to literary sites and museums, and creative projects such as writing and publishing a class novel. These experiences would provide opportunities for students to explore literature in a hands-on and interactive way.

I believe that the current English curriculum does not adequately cater to students who are passionate about literature and the arts. By introducing a new class, we can provide these students with a chance to pursue their interests in depth and develop their skills in writing and critical thinking.

I urge the administration and English Department to consider the creation of this new class as a means of better supporting the needs and aspirations of our student body.

—Melissa Foster

Students Speak

Howl Editor

Perhaps we should all be thinking about our future at Central. We are now in the midst of the annual PSSC. This is a time when students must decide what the future holds for them.

The PSSC runs from February to March, and it is a time when students must decide what their future looks like. This is a time when students must decide whether they want to go to college, or if they want to enter the workforce immediately after high school.

Many students are unsure of what their future holds, and this can be a daunting task. However, it is important to remember that there is no right or wrong answer. Each student is unique, and their future should reflect their individual goals and aspirations.

It is important to have a support system in place to help students through this process. This can include family members, friends, and teachers.

As students make decisions about their future, it is important to remember that there is no one right way to do it. Each student will have their own unique path, and it is important to be open to exploring different options. 

—Lori Livesay

Mad Machines

Munch Money

What may be known as the revolt of the milk and ice cream machines is occurring in the cafeteria.

Everyone who passes through the cafeteria has noticed the increasing problem of the milk and ice cream machines. These machines have been causing problems for some time, and the students are fed up.

The milk and ice cream machines are not only unsanitary, but they are also inefficient. The machines are often empty, and when they are full, they are slow in dispensing milk or ice cream.

This is a problem that needs to be addressed, and the students are calling for action.

—Ann Montgomery

Lunching Causes Problems

When a problem, or problems arise, it is necessary to try and find a solution. The administration at Central has seen certain problems for many years. A closed campus was the best solution they could find for these problems.

One reason is to stop the complaints of property owners caused by students eating in their garages and on front porches, a result of open campus parking. This closed campus parking is also a result of self-service eating at home. For example, having a beautiful meal "for it is known that proper lunches are not being eaten," related Philip H. Vercoe, school principal.

Only is cases where a special diet is required would a student living near the school be allowed to leave the campus. The school is responsible for the immediate area beyond the school. No buildings are to be entered, but the parking area is not restricted. It is not definite whether the building will be closed or not.

There is to be no eating in the halls, and no lunchrooms. Central could help clean up our town.

"Actually, eating in the cafeteria should be very pleasant. There will be a ride of coke, mood music, a large mirror and a variety of foods, such as hamburgers, quick service with two serving lines, drapes, and more than $500 worth of pictures," added Mr. Vercoe.

Why hasn't this been done before? We haven't had a chance to try it this year for the Junior Class. The March 17th annual Senior C carnival will be held as usual this year.

The second week in March will be set aside for "Junior carnivals," each of our Indian families a chance to show their wares. The spirit of Central will last until September for another year.

The seniors have spoken!

A connection with this letter is a brief description of the carnival.

The first PSSC took place as far back as 1936, and was held after the majority took place on and off for many years. From then on they took place off and no many years.

Side shows and concessions, sponsored by each class and by various clubs were set up in Central's main building.

The goals from the stands go to the respective classes and clubs.

Trash Cans Spark Comment

Forming opinions is a tradition that is popular all over the world. To coin a phrase "opinions are like Jelly Belly's". Here is the situation. Whenever something new makes its way into our lives, we are quick to offer opinions about that new thing. Whether we do it consciously or subconsciously, we form opinions of some kind.

Recently an innovation in innovation is occurring. People are forming opinions, not forming opinions, forming opinions, not forming opinions. There is a balance of power is unknown, and the balance of power is the balance of power is the balance of power. Is it unknown? Is it unknown? Is it unknown?

The nicer ratings range from one to five stars. Some, remarkably as it seems, were rated as they were rated.

The nastier comments range from one to five stars. "What is it?" one observed in the halls. "It is like the class last year which it was introduced." The class last year which it was introduced.

Sr. Engineers Participate in 5th In Science Year Day class.

The students doing their practice teaching are from the University of Michigan in Ann Arbor and Michigan State University in Lansing. They will be teaching part of the class as well as observing while under the guidance of the instructor. Next fall, they will be regular teachers, with their own classes.

Student teachers doing their practice teaching from M. S. U. are Michael Craine and Susan Cullison, who are working under Joseph Dowdy and Miss Patricia Odgers, respectively. In physical education, two of our students is working with Miss Grace Fields in her English classes and Gerald Murdock is working with Bryce Shaw in his math classes while Jen Munro is doing her practice teaching in Mrs. Louise Conklin's home economics classes.

From the O. M. these students are here for their practice teaching: Erwin Groteskold in teaching with Mr. Groteskold in teaching with Miss Jacqueline Kermer in her English classes and Nicole Richman in working with teachers Stanley White and David Parks in their speech department.

In the coming events include a band festival, March 18, and two concerts, March 24 and March 30.

Members of the JETS (Junior Engineering Technical Society) Club participated in the Fifth Annual Science Youth Day, February 20, at the Consumers Power Service Center although Science Youth Day was February 11, the birthday of Thomas Edison.

The guests were introduced by R. F. Fowler. The first speaker was L. L. Gille who welcomed the JETS members and science students. After Mr. Gille's remarks, D. W. Mansfield told of the JETS program of 1961.

In his address Mr. Mansfield said that JETS had been organized in 1961 at Michigan State University as an answer to the decreasing number of science students in the school of engineering.

JETS does many things in the JETS organization such as acting as coordinators to help start new clubs, providing outside engineering advice and providing field trips and engineers as judges at local contests.

The main topic of the meeting dealt with the Big Rock Power Plant, which is being built near Charle­vvo, Michigan. R. K. Keffer was the main speaker, and he talked about the scientific aspects of the plant.

Mr. Keffer is the director of nuclear activities for Consumers, and he has had the privilege of going under the cover in an atomic sub. Mr. Keffer first talked on their energy in peace time, radioactivity, and atomic reactors.

After this introductory information, he went to the main topic of the evening. To augment the lecture, the club collects sounds of '61 for records.

Another test date for the Scholastic Aptitude and Achievement Test is coming up on Saturday, March 18. Students interested in these tests should obtain a bulletin from William McNamee, dean of counseling, and fill out the necessary applications.

The following achievement tests are available at this time: English composition, social studies, intermediate mathematics, and advanced mathematics. Although this time are biology, chemistry, physics, French, German, Latin, and Spanish.

Achievement tests on Hebrew, Russian, and PSSC Physics are available at this time too.

A student may not take more than three achievement tests on one date. The achievement tests cost one, two, or three dollars.

Scholastic Aptitude Tests are available in various sections and are also available at this time.

The next test date is April 13. Voting is being held in favor of the student body to have one candidate for the Student Council.

The coming events include a band festival, March 18, and two concerts, March 24 and April 21.

Members of Central's Step Merit System Helps Form Future Staff

Both the Arrow Head and Prospectus have twenty-three pages this week. The number of pages is due to the many meetings and papers that have been presented this week.

The class works on the merit system. Final grades are given for papers and tests, and one hundred points are awarded to the student body on a test.

To be eligible for this course one must have average English grades and an interest in the course. Anyone who is interested may be approved by Miss Verlin Knight in 3117 before being sent as counselor.

JETS Members Collect Sounds of '61 for Records

JETS (Central Broadcasting Club) sponsors the decal sales, elected officers for the new semester on Thursday, February 9, at radio station WFRE.

Jack Mulder was re-elected president for the new season. These officers were: Barney Crain, vice-president; Carla Tuning, recording secretary; Diane Johnson, corresponding secretary; and Norman Hale, treasurer.

The new officers were installed and took over the duties of their positions immediately after the voting.

The club, under the guidance of Stephen All, directs its activities which are mostly concerned with gaining experience in radio and television equipment, and producing, directing, and engineering programs.

Bom ‘Bomb’ Sets World Record

"All OK," said Mark, my chief mechanic. "This ‘Bomb’ ought to clock about 700 m.p.h. before she hits second gear.

As it climbed into my 359579 horsepower, I could see the speedometer readings go around the maze of dials and other miscellaneous gadgets. ‘Bomb’ brought the ‘push’ track around and started me down the salt flats. But the howling wind was strong, and I had to work hard to see the tachometer and gaging since I seemed to have created quite a vacuum as I sallied by their cage.

When these four-souped-up Cadillacs mowed and relaxed into life, an exciting chill raced up my spine. I stood with the starting blocks at about 100 m.p.h.

After a brief nod from all the officials, the starter whipped the flag down. The tremendous acceleration in a de my earlobes touch behind my head. After a few seconds and about ten miles later, I passed the second signal and drove my car into a baul, I could hear the times gapping and laughing since I have been studied to find a new world’s record for land travel. I was very surprised, especially after I discovered I forgot to release the parking brake!

—Bruce Auer, junior

Amateur Beats Pro

It was a hot day in June and I had just finished mingling in the club pool. I walked over to the pro shop and started looking at some Arnold Palmer golf clubs with interest. It happened. Before I knew it I was starting at the one wood and the ball was going up. There I was, me, playing in the costliest tournament in the history of golf.

The announcer was speaking in a low tone to the people that I know. David Olson, was only two strokes behind Arnold Palmer coming on to the 17th hole. I could see myself with a determined look on my face as I stepped up to the tee. It was a par three hole and I put my first shot on the green about two feet from the pin.

I sank my putt for a two, but that didn’t help things because I knew I had a chance to win by getting an eagle on the last hole which was a par five. My drive on the eighteenth hole was 250 yards long and straight down the middle. The fans were silent now as I took out my three wood and prepared to hit my second ball.

Then all of a sudden it happened. The ball reached into my golf bag and drew the widest looking club imaginable. It still seemed very fast and didn’t even look like a golf club I had never seen it before, but something inside of me told me to use it. My second ball landed on the green about six feet from the pin. I walked to the green and studied it carefully. I took careful aim and sank my putt. The crowd broke into a roar. I had taken Arnold Palmer by one stroke.

Someone was yelling my name, but it wasn’t one of my relatives. It was one of my friends in the pro shop. He told me that he had called my name three times and told him that I was studying the golf clubs for fast play when I do that it is hard to get my attention.

—David Olson, junior

Ex-President Eisenhower

So very tall and stately does he stand, He held the highest office in the land, But in his pictures I could surely see A famous grin which spread from ear to ear, Although his voice was not too nice to hear. To hunt and fish was his delight. But I’m sure his morals told him wrong from right. In clothes so neat, yet head whenever bare He never lost his head, though there was little hair. Also quite noted for his “homburg” hat On which I wonder ever once.

He was in military fight the best, Next need to fear across the rolling sea, And still he’d lead his troops to victory, Back to the “forby-fight” this great man came. And soon he won the presidential game.

A man by all the world so much admired, But if he worked and almost never tired. He held his own against the great-oak table. Among the diplomats his work no fable.

For eight long years he’d gladly serve And from his duties he did not tire. As president I think he proved himself. Although some would have chosen someone else, For all his’s done has my deep respect. As on the past eight years I retrospect. But I believe he did his very best. And now he certainly deserves that.

—Robert Roshbrough, senior

Panther Tells Tale

I never believed in reincarnation but now... Since I left the human world, I have been many things, an antelope, a butterfly, a panther, and a swallow. Sometimes I was a large lynx and studied the back to the time of many years ago, when I was a panther in the Belgian Congo. I was a large, black panther, with a human brain, of course, and back to the time when, if I had done things differently, it would have changed the world today.

When I look back to that day, years and years ago, when I found that small baby under the giant tree in the jungle where the villagers were living, I think why did I have to do something about that baby? As the situation was, though, a large snake was twisting its way down a tree, down to the baby. Well, naturally, I fought the snake, because I just couldn’t let the baby go. I was, of course, because a snake like that was no match for a panther like I.

After the fight, I lay down beside the baby to protect it from any further threats, while I tried to figure out what to do. I decided to take the baby, who was still sleeping, to a village not too far from where we were. I knew a couple of people who would raise the child, so I thought I would give the baby to them.

I realized for the first time going into the village with the baby, because the villagers got very excited when they saw little baby. Now, of course, with him I thought back to the time when, if I had done things differently, it would have changed the world today.

Well, the baby was a he, and the people with whom I left him raised him and gave him an education. He has become the most renowned person in recent years, but I can’t say that saving him that day years ago did much of anything. He has accomplished a number of things, I don’t know how good they were among them government he set up. Well, anyway, as I say, maybe he should have saved myself the trouble of solving the matter, he was killed awhile ago anyway, for many people disliked his ideas, I guess. Well, maybe Patrice Lumumba did do some real good, I don’t know, a swallow doesn’t see many newspapers these days.

—Jean Campbell, junior

Illustrated by Chuck Redick

Spring

Spring, spring is a wonderful thing, It’s a time for gaiety and joy The birch and bees with their sweet melodies Make every feel like a very young boy. There are things to hear in the spring of our year An umpire yells, “Play ball!” The trees as they sway, the children play, And the petter of rain drops as they fall. The flowers will soon begin to blossom The grass grow tall and green. Easter is near this time of year, And spring is the time to dream.

—DAD

My dad is short, not over five feet tall With hair of gray—the sign of aging men Though not yet stocky he is not slim. Those added pounds are soon to vanish A stern appearing man whose eyes of blue Can make one feel he’s staring straight through you. Indeed, a most distinguished looking man And always willing to help if he can. His work is with a life insurance firm. And if you pay your dues you’ll be made you squirm With guilty conscience. Always unkind. His helpful answers should he comprehends My questions. Very rarely do we fight But when we do he’s almost always right. His sense of humor is among the best. To see one need only be her friend. For a short while. Mistakes he never makes. He’s right unless he’s sure. I think the virtue that I most admire Is patience which I so long to acquire. Though not a genius he is more than smart. When helping me, he’s done before I start! His greatest fault is that of overwork. No job, no task, no duty will he refuse. A kinder, wiser father can’t be found, His mother does not live around the world. I only wish that some day he’d see some of the happiness given to me. By him. Not just a father but a friend. He’s there through good and bad until the end. Not known by all but loved by none. With their pais he has many a friend and not a foe. I love him not from duty but because To me he is a human close to God. —Jim Connors, senior
Imaginative Short Stories

TigerPitcher Loses Game

It was the seventh game of the 1961 World Series between the Detroit Tigers and the New York Yankees. Each team had won three and the Tigers would be awarded to each other. There were 50,000 people at Tiger Stadium to see the most exciting game of the season. Detroit was ahead 3-1 in the top of the ninth inning. The crowd was right; for in the last half of the ninth inning, the whole team was seen laughing and the pitcher hit a grand slam. The Tigers would be awarded to each other. There were 50,000 people at Tiger Stadium to see the most exciting game of the season. Detroit was ahead 3-1 in the top of the ninth inning. The crowd was right; for in the last half of the ninth inning, the whole team was seen laughing and the pitcher hit a grand slam. The Tigers would be awarded to each other.

Revenge

A wave that laps at the feet of despair, And washes away the hurt. A sweet wine which leaves a bitter taste In the depth of a human soul. An attempt of gladness which clashes on the jagged peaks of a canyon Where loneliness echoes. A tree which stretches his branches toward the sun of satisfaction. And does not quite reach.

A Gentleman

Chester F. Henry, with his polka-dot tie, is our chem teacher and he's quite a guy! On the list of experience, he's found near the top. And because of his patience, he referred to as "Pop." He sets "intense knowledge" as true. And I consider our middle name MOLE. Very thorough are his class explanations. The topics we cover are of great variation. A man of genius I believe! He's a real book worm book! (Wasn't he none but Lab days prove to be lots of fun. We measure by grams and forget about tons. He wants us to think that he is really quite gy by telling us often a whopper of a story. "With the thistle-tube you must be careful," (and, oh, how we try!) "For I am careless, I'll leave you to die!"

PASSING, N., lines read to the students or by the students in the English departments, as the French departments, as the French departments, as the French departments.

PREP SCHOOL, N., an after-school dance where the boys try to catch the prettiest and the girls try to decide which girl is wear ing the most expensive dress.

PERSISTIC, AD, accepting your grades as are without any help, or can teachers might lower them.

TEACHERS, N., one who teaches students, or by the students in a school room, occasionally, "Do you have a story around to write on the board?" The teacher is as employed to keep students after school.

Bleeding Rubber Arm

It was fascinating to watch the results of the experiment. The display on medical technology. The blood was shot into the tubing as a method of confusing the students or by the students. One member of the class. The huge crowd around it, I watched the face of the student near me as he turned his head toward me. The student near me as he turned his head toward me as he turned his head toward me. Penny Gaylord, senior.
Council Urges Better Breakfast

Serving students who for some reason have been unable to get up in the morning without having time or not taking time to prepare themselves breakfast is a project of the Student Council at Central. This group sponsors a breakfast each morning from 7-9 to 8:50. As a la carte menu is offered to the students. Milk, both whole and 1% milk, and orange juice are served. Hot chocolate is also being offered to the students and a variety of fruits may be selected. The cost of each item listed above varies from three cents to a dime.

Supervisors of the breakfast are Brenda Lecocq, Mrs. Louise Conklin and Mrs. Luene Rau.

Doughnuts has charge of the breakfast at one time, alternating each month. This month the junior class is in charge of the breakfast. The Sophomore class will take over during the month of March. All proceeds taken from the breakfast go into the Student Union Fund.

P. H. Vercece Appoints Sr. Junior Lion

To represent Central at the Flint and chocolate, Aron Philip H. Vercece, principal, has chosen Mrs. Emma Bowers, junior, senior. Traditionally, a senior class member is chosen to go to these meetings, but because of various conflicts cannot make it.

The purpose of the Junior Lions, as the representatives of the three high schools are called, is to become better acquainted with business and professional men in the Flint area. In exchange, the members are given a chance to observe these teen-agers and become informed on their activities.

Doughnuts attends the weekly luncheon meetings every Wednesday. She joined the Dun and Hotel with Longwell Grant, Whittier Junior High School principal, and Philip Karon, mathematics and French teacher at Whittier.

BICYCLES CLEANED AND GREASED

Gaining places in the Saginaw Valley wrestling meet were Gary Latimore, second place at 138; Dennis Jager, third at 145; Tom Buckley, fourth at 130; and Bob Cheney, fourth at 112. (Photo by Dave Kiefer.)

Matters Pin Valley Win

Northern High School capped the Saginaw Valley wrestling championship February 25 at Bay City. Of the six participating schools Central placed fourth with 38 points. Northern’s first place was determined by 85 points, followed by Bay City Handy with 73 and Bay City Central with 56. Pontiac placed fifth with 34 points and Southwestern sixth with 30.

Central placed Leroy Burke, Dennis Jager and Hugh Parker in the finals. Of these only heavyweight Dennis Jager gained the championship. Jager won his match against Rick Spaz of Bay City Central in overtime with a score of 2 to 1.

Tom Buckley, 190 pounds, won his match in the preliminary round but was eliminated in the semi-finals. Dennis Jager and Leroy Burke were the only wrestlers Central placed in the regional wrestling meet. Northern finished in first place in the meet held at Saginaw High School. The winner of this game plays Beecher. The winner of the final game enters the regional tournament. All district games are played at Saginaw; the regional games are played at the I. M. C. in Bay City. The district game against Beecher started at 9:30 p.m. on Wednesday, March 7.

Indians Draw

For Play-Offs

Losing their last basketball game of the season, Central gave way to Saginaw Arthur 71-79. In the drawings for the district play-offs Tuesday, February 26, Central drew Lapeer High School. The winner of this game plays Beecher. The winner of the final game enters the regional tournament. All district games are played at Saginaw; the regional games are played at the I. M. C. in Bay City. The district game against Beeccher started at 9:30 p.m. on Wednesday, March 7.
Eight Lettermen Return to Action

Beginning practice on March 19, Central's baseball squad was ready to go. Coach Tim Bogrulak's squad could not be better prepared because of a Saginaw Valley ruling that all schools must begin practice on the same date.

This year's returning lettermen are Captains Tom Jener, outfield-pitcher; Jim Cope, left fielder; Stan Bloomfield, lefty; Dave Lang, pitcher; Dick Hornung, pitcher; Steve Boyer, outfielder and pitcher; and Timm Rye, outfield. Returners are infielders Jerry Roberton and Bill Riley.

Coming up last year's junior varsity is catchers Larry Wells and Bob Sinclair; infielders Forrest Powell, Ronny Rau, Davey Cross, and Howard Walker; and first baseman, Jim Fent. Outfielders Dale Fyfe, Steve Stazo and Johnny Johnson are also up from the junior varsity.

Pitchers Bob Langenburg and Dick Maclmilan, and infielders, also have an excellent chance for varsity action.

This year, because of the entry of Southwest and Mill City into the City Handy into the Saginaw Valley Conference, Central is limited to only one regular valley game with any other school.

Also because of a new ruling, Central was limited to seventeen play dates. On these available days 18 games were scheduled, with four Saturday doubleheaders.

Varsity Baseball Schedule
April 15 - Owosso (16) ... Home
April 16 - Metro (12) ... Away
April 20 - Central (16) ... Home

GETTING AN EARLY START

On track practice this year are new coach Carl Krieger, Herb Mitchell, Ron Shaw, and Hiram Bruder. Denise and Shaw are distance men, while Mitchell and Bruder run the sprint events. (Photo by Dave Hilder).

Krieger Coaches Harriers

Carl Krieger, new head track coach, stated, "All positions on the track team are open, for grab and the best man out for the position will get it!"

Among the boys returning last year are Bob Den- een, Cloyce Dickerson, Fred Evans, Charles Miller, Herb Mitchell, Fred Nickerson, John Shaw, James Toles, and Gerald Vaughn.

Krieger also stated, "I expect to see a lot of boys who are out for the first time this year.

Among the newcomers are Norman Alexander, Ed Mathey, Barry Potter, and Cooper; John Grant, Marvin Bagley, Axel Baxter, William Graham Willard, and Johnny Krieger wished to impress upon any newcomers that they are welcome to compete with any letterman for his position.

The first meet, a series of relays, will be held in Midland on March 28.

Nutters, Golfers

With spring just around the corner, a young man's fancy turns to love—sometimes. To some boys, spring means it's time to get their tennis racquets and kites up and shine the golf clubs.

Coach Robert Luce has four returning lettermen from which to build his golf team. Jerry Howard, Gary Lathrop, Dick Mitchell, and Dick Morse are all seniors, and their status this year will be determined by the end of the season.

As soon as the weather permits, the boys will be playing eight holes at the Broadmoor course every afternoon after school.

Five men compose a golf team, but Mr. Luce keeps about seven men on the varsity squad, with about seven or eight others who may work up to the varsity. All boys interested in golf should see Mr. Luce in room 212.

The squad will be decked out in new jackets this year, which are part of a black Pilot Central emblem on the left front side.

Beginning the season, Central has only five returning letter men, and only one member of the varsity team.

The team has only four returning seniors, all of whom are lettermen. However, Jim Cope, Jerry Hornung, Jerome Winograd, and Paul Mato, have all participated in varsity contests. Jim Cope is approxi mately fourteen years old.

Look to Spring

Among the returning athletes are those who have begun to take form in the sports world, a skeleton of a team which will take shape as the season progresses.

Among the returning athletes are those who have begun to take form in the sports world, a skeleton of a team which will take shape as the season progresses.

Skeleton Teams Make Progress

Along with the usual amount of snow and cold weather, the winter of 1959-1960 brought what is termed in the sports world, a skeleton crew of athletes at Central.

Basketball, wrestling and swimming all had a job of rebuilding to do.

This came about mainly because of the addition of Saginaw Valley which brought homes to the talent which would have represented us.

The results of this skeleton season were experience and a lot of hard work, but no victory for Central's Indians.

This year's skeleton is beginning to take form and blossom out as Central is starting to again reap victories from their patients.

Our basketball team has gone from a tie to first place last season to a fourth place finish in the Valley this year, playing .500 ball with a 5-0 record against competition which comprises one of the better teams in the state.

The greatest honor came in winning the City championship with a perfect 40 slate, de sired by defeating Northern and Southwestern.

Our baseball team, though only one win from the eleven games played, has given enough hope for an even more improved team next year by capturing five of twelve contests and tying one.

Our swimmers compiled a 3:1 record as compared to 3:0 last year. The figure is deceiving in the fact that the improvement was not shown in the win-loss record, but rather in the closeness of the contests.

With the skeleton crew con tinuously making improvements, next year's team could provide some athletes of state calibre and teams of Valley superiority.
